

APPLICATION OF OLEOZON IN THE HEMORRHOIDS.

G. Morris, S. Menéndez¹.

Cira García Central Clinic, Cuba.

¹Ozone Research Center, Cuba.

The knowledge of the results obtained with "OLEOZON" in the treatment of infectious-inflammatory affections and the non existence in literature of its utilization (application or use) in anal affections, constitute the central and main reason for its application in 200 patients carrying symptomatic hemorrhoids, that came to our Clinic to be assisted in "Gynecology " or "Obstetrics". The quick disappearance of the symptoms, as well as the regression of the lesion, place "OLEOZON" within the effective therapy for this affection so frequent in our population.
